**SUBCONTRACTOR PREQUALIFICATION**

*"Every Employee Returns Home Safe... Every Day."*  
HCC Safety Mantra

**9 March 2010**

ATT Prospective Subcontracting Company  
RE Subcontractor Pre-Qualification Process

Dear Sir or Madam,

At HCC we take pride in our quality of work, our professional ethics, our employees, our consummation of projects and our impressionism upon clients and entities alike. HCC has been a prominent General Contracting Company, Construction Manager, and Design/Build Contractor since 1974; our portfolio includes medium, monumental, and historical projects. Our reputation is preceded by our employees and our partnering subcontracting companies who we partner with on a day to day basis throughout countless projects. Our corporate slogan, 'Tradition in Excellence', has provided an outstanding reputation throughout the years on thousands of projects. Among that tradition are our core values - Integrity, Commitment, Partnership - and it is those values that have carried our company over the years. With every contract, we use the uttermost Integrity with regard to every area and aspect of the construction industry, not only as it applies to the job, but above and beyond that which is required and expected. With every project, we are committed in every way to do our best and leave a lasting impression upon the minds of those with whom we conduct business. Finally, Partnership serves as one of our most treasured values. For on every project our Project Management Team strives to partner with the client, engineers, and architects to provide state-of-the-art construction and build a lasting friendship built on honesty, experience and trust.

Safety is our number one priority at HCC. We mandate a "100% Stringent Safety Policy" with every employee, on every project, every day. As we manage a project, we expect all subcontracting entities to follow the same procedure strictly and efficiently to ensure that our safety policy mantra - "*Every Employee Returns Home Safe, Every Day*" - remains true for everyone who works on or visits our project sites.

Finally, we value our public and private partnerships with business entities and business men and women alike throughout the construction industry. Throughout the past years HCC has partnered with many companies to further negotiate work and/or serve as the lead Design/Build Contractor for the project. HCC avidly seeks qualified and experienced individuals within the realm of commercial and industrial construction. Behind every structure we build there is a Project Management Team of talented, experienced, and leading professionals working together to deliver unsurpassed excellence, sufficiency and environmental sustainability. Given our broad level of expertise and range of construction services, your employment opportunities, should you choose HCC, will be truly vast. At HCC, you are not just building structures; you are constructing a portfolio of skills and experiences that will sustain your entire career. We recognize that our employees want to be both challenged and engaged throughout their professional experience, which is why HCC incorporates a vast array of projects encompassing the entire industrial and commercial parameter of general construction, management, and design/build engineering.

At HCC, we review and evoke extensive consideration in approving candidates for the subcontractor bid solicitation process, therefore we ask that in compiling the required documentation and completing the required forms please be sure and include all information possible, deliberate as much as possible and let us know how your company will aid ours in providing a '*Tradition of Excellence*' for many more decades to come.

Regards,

**John B. Hall**
